

Meet the people behind the technology.

Dr. David W. Clary

Vice President, Chief Sustainability Officer

Dr. David W. Clary serves as Vice President and Chief Sustainability Officer of Albemarle. In this position, Dr. Clary oversees the company's technology groups to accelerate the creation and commercialization of socially and environmentally sound products. He manages all aspects of Albemarle's global advocacy efforts to raise awareness of the safety and performance of the company's existing products, and also ensures that future products meet or surpass societal criteria.

With over twenty years experience in process technology, research and development, and business management, Dr. Clary most recently served as Division Vice President of Albemarle's Fine Chemistry Services group.

Dr. Clary graduated from Louisiana State University with a Bachelor's Degree in Chemical Engineering in 1981. He continued his studies at LSU, where in 1985 he received his Ph.D. in Chemical Engineering.
